Diseases, Symptoms & Medicines

Sample educational PDF for testing a RAG ingestion pipeline

Important safety notice: This document is fictionalized/sample educational content for software testing only. It is not medical advice, does not diagnose conditions, and does not recommend medicines or doses. Medicine suitability depends on age, pregnancy, allergies, other conditions, and other medicines. Consult a qualified healthcare professional. Seek urgent medical care for severe or rapidly worsening symptoms.

How to use this sample

Use this PDF to test PDF text extraction, chunking, embedding generation, and Qdrant payload storage. The entries are deliberately short and include repeated headings and context to make retrieval tests easier.

1. Common cold (sample overview)

Symptoms / description: Example symptoms: runny or blocked nose, sneezing, mild sore throat, and cough. Symptoms can overlap with flu, COVID-19, allergies, and other illnesses. This sample does not establish a diagnosis.

Care / medicine safety information: General care information: rest and fluids may support comfort. A healthcare professional or pharmacist can discuss suitable symptom relief. This document does not specify a medicine or dose.

Retrieval keywords: Example retrieval terms: common cold, runny nose, sneezing, sore throat, cough.

2. Seasonal allergic rhinitis (sample overview)

Symptoms / description: Example symptoms: sneezing, itchy nose, watery eyes, and clear nasal discharge after exposure to pollen or other allergens. Symptoms may resemble a cold.

Care / medicine safety information: General information: reducing exposure to triggers may help. Some allergy medicines can cause side effects or interact with other medicines. Ask a qualified professional about suitability; no product or dose is recommended here.

Retrieval keywords: Example retrieval terms: allergy, pollen, itchy eyes, sneezing, rhinitis.

3. Tension-type headache (sample overview)

Symptoms / description: Example symptoms: pressure-like or tightening pain, often on both sides of the head. Headaches have many causes, and this sample is not diagnostic.

Care / medicine safety information: General care information: hydration, rest, and taking breaks from prolonged screen use may help some people. A professional can advise whether any medicine is appropriate.

Retrieval keywords: Example retrieval terms: headache, pressure, head pain, tension.

4. Heartburn / acid reflux (sample overview)

Symptoms / description: Example symptoms: burning discomfort behind the breastbone, sometimes after meals, and sour taste. Chest discomfort can also signal an emergency.

Care / medicine safety information: General information: a clinician can evaluate recurring symptoms and discuss lifestyle measures or medicines if appropriate. Do not self-treat severe chest pain.

Retrieval keywords: Example retrieval terms: heartburn, reflux, burning chest, sour taste.

5. Diarrhea (sample overview)

Symptoms / description: Example symptoms: loose or watery stools, sometimes with abdominal cramps. Causes vary, including infections and food-related conditions.

Care / medicine safety information: General care information: preventing dehydration is important. Seek medical advice for blood in stool, signs of dehydration, persistent symptoms, high fever, or symptoms in vulnerable individuals. No medicine or dose is specified.

Retrieval keywords: Example retrieval terms: diarrhea, loose stools, dehydration, abdominal cramps.

6. Fever (symptom reference)

Symptoms / description: Fever is a symptom rather than a disease. It may occur with infections or other conditions. Associated symptoms and the person's age and health status matter.

Care / medicine safety information: A healthcare professional can assess the cause and advise on care. Urgent assessment may be needed for very high or persistent fever, confusion, breathing difficulty, stiff neck, or concerning symptoms in infants.

Retrieval keywords: Example retrieval terms: fever, temperature, chills, infection.

7. Medicine information: paracetamol / acetaminophen (generic reference)

Symptoms / description: This is a commonly used medicine ingredient for pain or fever in some settings. Safe use depends on the person's age, health, product strength, and other medicines.

Care / medicine safety information: Potential risks include liver injury from excessive intake and accidental duplication across combination products. This sample provides no dose. Ask a pharmacist or clinician and follow the product label.

Retrieval keywords: Example retrieval terms: paracetamol, acetaminophen, pain, fever, liver safety.

8. Medicine information: cetirizine (generic reference)

Symptoms / description: Cetirizine is an antihistamine ingredient used for allergy symptoms in some settings. Whether it is suitable depends on individual circumstances.

Care / medicine safety information: It may cause drowsiness in some people and can interact with other substances or medicines. This sample provides no dose. Ask a healthcare professional for guidance.

Retrieval keywords: Example retrieval terms: cetirizine, antihistamine, allergy, drowsiness.

9. Medicine information: oral rehydration salts (ORS) (generic reference)

Symptoms / description: ORS is a formulation used to help replace fluids and electrolytes in certain cases of dehydration, such as from diarrhea.

Care / medicine safety information: Use a properly prepared product according to its packaging and professional guidance. This sample does not provide a mixing ratio. Seek medical care for severe dehydration or inability to keep fluids down.

Retrieval keywords: Example retrieval terms: ORS, oral rehydration, electrolytes, dehydration.

10. Medicine information: antacid (category reference)

Symptoms / description: Antacids are a category of products that may provide temporary relief of some heartburn symptoms. Different formulations contain different ingredients.

Care / medicine safety information: Suitability can depend on kidney function, other medicines, and other health factors. Ask a pharmacist or clinician; this sample does not recommend a specific brand or dose.

Retrieval keywords: Example retrieval terms: antacid, heartburn, acid indigestion.

End of sample document. For real clinical use, ingest only reviewed, authoritative content and implement safeguards appropriate to the application.
